WHEN HANDING MEAT IN PLEASE NOTE THE FOLLOWING.

The quality of the meat is determined on how it is handled. Field preparation is important, please take out stomachs and bleed properly within 5 minutes of shooting.

We prefer animals to arrive in their skins, this prevents discolouration of the meat and leaves a better result. It also makes for cleaner transport, no dust etc. Identification of species is also more obvious.

Please don't break carcasses up either, unless in the event of a large animal - as this causes confusion as to which pieces belong to which animal if more than one carcass is broken, requires more marking and ends up taking up more hanging space

Please mark animals clearly, cable ties work the best. In the event of cable tie colours being limited add two of the same colour (i.e., double black) or add two separate colours (i.e., red and white) to differentiate. Please source these before you go hunting – the karoo has limited colour options available.

A clear instruction from each client is required with all the basic details, before or once delivered please – the sooner we receive the instruction, the sooner processing can start. WhatsApp the instructions to 082 306 5722 – no phone calls please, we will call you if something is not clear and confirm the request.
